Customer Reviews

After the 37th Issue of "Guide to U.S. Stamps" had held in my hands, I was impressed by the colorful presentation of the catalog very much. The title page is decorated with the block "Hawaiian Rain Forest" from September 1, 2010. Since January 1978 (37 years) USPS put up this wonderful catalog given out once a year. The current issue has a very readable font and comes in size 20 cm x 27 cm x 1.8 cm (width x length x height) - match the page size letter - plus 2 cm on the left side for the 18 ring plastic binding that looks very stable. The catalog is available directly from the United States Postal Service to belong to the same price as here on. It starts with the entire editions of 2010, which are explained in great detail with many insightful information distributed through the catalog. From page 12, the price valuation of stamps will be explained. This is followed by a chapter on the "art of stamp collecting" and a declaration on stamp duty. Reviews from classification Superb to heavy Cancel. From page 14 the first issues of U.S. stamps since the first edition of 1847 is

listed. In addition, there are numerous varieties with price rating. The stamps are somewhat smaller illustrated in color, but they are printed very well because they are presented on a black background. Spread each with 3 columns, you can find a list of the Scott number, the type of paper, perforation, watermark, value impression motif, color, the value of unused and used stamps and countless other details. The exact date of issue of corresponding hardware stamps are also listed, such as detailed information on varieties with pictures of stamps and postal stamp blocks. After a little practice, you find yourself in spite of the many details along very well.
