The Most Beautiful Wine Cellars In The World

Synopsis

The most beautiful wine cellars in the world provides a unique perspective on the most beautiful, impressive and atmospheric cellars through which many a wine enthusiast would gladly be allowed to wander. An intercontinental journey through both ancient, hidden-away 'treasure troves' as well as latter-day wine cellars held by wine producing domaines, wine merchants, hotels, restaurants and private individuals. The entries were coordinated by wine connoisseur Jurgen Lijcops, who has worked as sommelier and chef-sommelier in a variety of leading restaurants. Thanks to the hundreds of full-page photographs and splendid details, you are able to take a fantasy tour passing alongside musty bottles centuries old, wrought iron gates in subterranean tunnels and grottos, wine racks stretching for kilometres, cellars not open to the public, wine archives, ageing cellars, glass wine cellars and contemporary cellars fitted with the very latest in gadgets.

Customer Reviews

Oh, how I love books that purport to be the "most" something, "best" something, etc., and fall flat on their face as an obvious pretentious ripoff. Most people thinking of buying this outrageously overpriced ripoff are likely seeking ideas to help them build their own cellar to a high standard. Most assuredly, they can look elsewhere, for almost none of these are appropriate for that purpose. Almost all of these are hardly "beautiful" cellars, for one thing. Famous, yes. Historic, yes. Rustic, primitive, most certainly. For most of these are historic underground cavern-type cellars of famous chateaux, hotels, restaurants, etc, many going back hundreds of years. Almost all are

simply caves carved out of the basement stone underneath, such as limestone. Almost all the photos simply show old wines laying on their sides on stone shelves in these caves, gathering dust over the decades. Anyone seriously into wine has seen this type of old chateau cellar many times before, and a book full of them is of little value for the extremely high price. The two 5-star endlessly-gushing reviews here are to me highly suspect. For one thing, they were both written within two weeks of each other, some two years ago. And, oh, my, one reviewer calls these 300 "stunning" photos, no less. No, they're not "stunning", they're just photos of old wine cellars. Not a single one "stunned" me, I assure you, and I do in fact get occasionally stunned by outstanding photography. The other 5-star cheerleader chirps valuable insights such as "one sees that for some wine collectors and connoisseurs, wine can be like fine art." Gosh, that's deep. And: "seen in some photographs is the dust accumulated on the old bottles."

Many of the nearly 60 wine cellars photographed are found in the renowned wine regions of Europe--France, Italy, and Germany. But there are also many of this appreciable number from regions which have not been known as wine-growing regions for centuries, but which nonetheless have come to be established as regions producing desirable wines for wine lovers around the world. The book on wine cellars made up largely of photographs of them brings in both the old and the new. Among the newer areas are the United States and Canada, Lebanon, and China too. Belgium, the United Kingdom, and Monaco are among European areas brought in which have not been traditionally identified as areas associated with fine wines. And as wine cellars is the topic, the wines cellars of outstanding hotels expands the geographical area even more; though most of the hotels are in cities or regions with ties to the modern international wine trade. There are also photographs of wine cellars of private homes, one cellar containing more than 80,000 bottles in six cellars throughout the home. This variety of cellars brings a new perspective on the subject of wine to many readers. One sees that for some wine collectors and connoisseurs, wine can be like fine art. The sequence of the wine cellars from older to newer roughly follows both the geographical spread of the development of new wine areas and interest in wine and also the development of wine cellars. Each cellar is introduced with a short essay on its origin, history, size, etc. It is the photographs especially though which highlight such developments in the field of wine and wine cellars. Catacomb-like ancient wine cellars have kegs of wine and wine bottles stacked one on top of the other in rows in recesses of tunnel-like or cavernous areas.
