Customer Reviews

We just got this book yesterday and my seven year old wild and crazy ADHD kid LOVES it! In fact, this 35 year old mom had a great time with it too! When you see "board book" you think that it's for little kids, but it's definitely for all ages. He read it himself and enjoyed discovering what the "instructions" were on each page. As you go from page to page, the book becomes different things and tells you what to do with it. His favorites were when it became a sled that he stood on, a horse to sit and ride on, and a surfboard to stand on. He was having so much fun pretending that he was

encountering all kind of different things on his rides, and insisted that I ride the things with him. There were also other fun pages such as when it became a steering wheel as you drove through the jungle, and when it had you hold the book up with your feet, act like a monkey, and pluck the bananas out of the tree. I highly recommend this book for kids who like to move and pretend. It's on about a second grade reading level too, so good for integrating reading practice while playing!

We bought this book at the Lolly and Yoyo book release party and my kids and I love it. They love how the book itself transforms to a car, a surf board, a sled and other things. It sparks their imagination and really does inspire them to get up and move. It's a super creative beautifully made book that I will be purchasing for all upcoming birthdays.

This is a wonderful book for children and parents! What a unique concept. We need more media like this to get people active. Duos to the authors.

Bought for my 18 month old neices. Even though they don't get the interactive stuff yet, they love the handles and being able to carry it around.

We love lolly and Yoyo
