Synopsis

PART OF THE NEW JONES & BARTLETT LEARNING INFORMATION SYSTEMS SECURITY & ASSURANCE SERIES - Click here to learn more: http://www.issaseries.com/ The Second Edition of Security Strategies in Linux Platforms and Applications covers every major aspect of security on a Linux system. Written by an industry expert, this book is divided into three natural parts to illustrate key concepts in the field. It opens with a discussion of the risks, threats, and vulnerabilities associated with Linux as an operating system using current examples and cases. Part 2 discusses how to take advantage of the layers of security available to Linux--user and group options, filesystems, and security options for important services, as well as the security modules associated with AppArmor and SELinux. The book closes with a look at the use of both open source and proprietary tools when building a layered security strategy for Linux operating system environments. Using real-world examples and exercises, this useful resource incorporates hands-on activities to walk readers through the fundamentals of security strategies related to the Linux system. Instructor Materials for Security Strategies in Linux Platforms and Applications include: PowerPoint Lecture Slides Exam Questions Case Scenarios/Handouts About the Series This book is part of the Information Systems Security and Assurance Series from Jones and Bartlett Learning. Save your money. Do not buy this book...The book is just a collection of general best-practices that anyone can find using google.- No real-word examples in the book- No intrusion detection howto- No scripts ready to use, no handy labs, etc.- How to secure Cloud, OpenStack, Docker and virtualization, etc..., have not been addressed in this book- Finally, in one word: this book is a bit expensive for nothing...

Throughout the book there are various areas where they've used a font that doesn't render properly in the Kindle Client for Mac. (see image). So, in the key points they're trying to make? You can't read what they're highlighting.How did they not catch this?
