I found this book to be quite practical and fun. If you love crafts, working with your hands or just looking for a way to add a personal touch to the gifts you give to others, this is a really neat way to do it. Citric acid plays an integral role in the recipes because it is that additive which accounts for the foaming ability of the bath bombs. There are alternatives though. The wonderful thing about these is that you can use your favorite fragrances and colors.

I learned what bath bombs were several years ago when I went with a friend to a Lush store at the mall. I was gifted a bath bomb shortly after, and became obsessed! It was not a pocket friendly obsession at all. Each bath bomb cost at least 5 bucks (for the non-fancy kind) --- and the mall that carried it was 40 mins away...so lots of gas/time went into buying it as well. Well, this year I decided to be more economical and just take Epsom salt baths instead, which are relaxing but BORING!

Somehow I was surfing the web and realized that I can make my own, really?! I can't imagine how much money I could have saved throughout the years if I knew about that sooner. This eBook was very helpful. With the help of the directions in this book, I've been creating my own little master pieces at home for a fraction of the price! Boy, is my pocket book happy. I can go back to my relaxing baths and it's even more rewarding now that I make the bath bombs myself. :)

A very clear, easy-to-understand guide with a healthy amount of humor thrown in. Beth White starts with the basic recipe and expands from there with an almost endless list of variations for almost any recipient. Can't wait to try this out as favors for an upcoming bachelorette party and for many other occasions! I find this book, a value for the price that I've paid for purchasing the book. "Bath bombs" was a fairly new term for me until I read this book.

The ingredients were easy to obtain and the process was pretty simple. However, I didn't get the consistency just right and it was a little sticky and slippery, but I am assuming that if it is prepared correctly, it would work even better. I'm not sure if all of them would turn out to be great because I am skeptical about some of the ingredients used in the other recipes. I will post an update if I try some again and see good results.

They are actually the little natty things that we can add to our bath. At times, if the so called " Bath Bomb " is effective enough, it will help your muscles relax and also refresh your skin. This book has a variety of ingredients, methods and procedure to make such bath bombs and most of them are effective. I've only tried one yet; it was the one that's mentioned under the title of Bath Bombs without Citric Acid Recipe.

As the title said this book is for beginners, and not for experts in making Bath Bombs. It explains how to make them, what are the basic ingredients and it also provides recipes for different bath bombs. Each "recipe" is explained step by step. All in all this is a great book for all of you who

wanted to make bath bomb on your own and never dare to do it. Grab this book and make one. It is fun. And enjoy your bath.

I would have liked some pictures because I'm more of a visual learner but that's more of a personal preference. I'm thinking of making more of these for an upcoming baby shower! This is really amazing book. I love making gifts for my family and friends, especially those that can be use, so 'Bath Bombs for Beginners' I find this short book a good well of inspiration for gifts for upcoming holidays season. Good job!
